## ABOUT

I'm full stack developer who is passionate about creating user-friendly applications from concept to deployment. With problem-solving expertise and a commitment to staying current with industry trends, I thrive in collaborative environments that foster creativity. Let's work together to create something amazing!

## SKILLS

- LARAVEL
- VUE/NUXT
- MYSQL
- FIREBASE
- FLUTTER
- AWS S3, IAM, EC2
- REACT/NEXTJS
- TAILWIND, BOOTSTRAP
- TYPESCRIPT
- NODEJS

## EXPERIENCE

### FULL STACK DEVELOPER

MMC IT SERVICES

2022 - Present

- Led the development of an eCommerce Web App using Laravel and Vue.js from scratch, collaborating closely with the project manager and the team. I also helped design the database alongside our Senior Developer and assisted mobile developers with API creation. Additionally, I contributed to an existing system using Laravel and Angular. Implemented Unit Testing throughout the process
- Integrated various APIs, including Clickpay, HyperPay, and Tabby for payment integration, as well as the Google Analytics API to enhance data-driven decision-making processes.
- Backend — Engineered the backend tech stack, database migrations, scripting, CRON jobs, security, unit testing and REST API.
- Frontend — Utilized Vue.js and Bootstrap to create visually appealing interfaces from Figma designs. Ensured cross-browser compatibility and mobile responsiveness. Collaborated closely with UI designer for accurate implementation, delivering high-quality frontend solutions.

## EDUCATION

### BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Philippine College of Science and  
Technology

2018 - 2022
